II-SDV
Nice, 20-21 April 2015

**International Information Conference on Search,
Data Mining and Visualization**

The **2015 II-SDV** meeting takes place in NICE 20–21 April 2015 for an intensive two days. The meeting provides an international forum for those in the field of tools for advanced search applications, data and text mining, and visualization technology. The primary focus is on tools for intelligence and the meeting examines the requirements of specialists in scientific, patent and technical information

The meeting will be of interest to those who wish to update themselves and keep in touch with the leading edge of information search and analysis tools and technologies; it features approximately 20 speakers for the two days. There will be an adjacent, focused **exhibition** to complement the conference programme.

**Keep in touch with the
best tools for intelligence**

An aerial photograph of a vibrant coastal town, likely Nice, France. The town is built on a hillside, with colorful buildings in shades of orange, yellow, and red. The buildings have terracotta roofs and many windows with shutters. A prominent white church with a dome is visible. The town overlooks a harbor filled with numerous sailboats and other boats. The water is a deep blue. The background shows a lush green hillside.

Sharpen your focus!

The *Cookbook of Reports & Visualizations* shows how you can use tools in the BizInt Smart Charts product family to support product lifecycle planning and portfolio management.

- Integrate data from the leading patent, drug pipeline, clinical trials and sequence databases.
- Create reports and visualizations tailored to the needs of your analysts and decision makers.
