AI-SDV 2022

10-11 OCTOBER · VIENNA, AUSTRIA

AI-SDV 2022 The Meeting

AI-SDV 2022 Conference and Exhibition is planned to be held physically and virtually. Speakers, attendees and exhibitors are invited to join physically and virtually in Vienna, Austria. We are developing a range of digital formats that respond precisely to the speakers, attendees and exhibitors needs, enabling individuals and exhibitors from AI industry and related sectors worldwide to participate in the AI-SDV 2022 in Vienna.

The Artificial Intelligence Conference on Search, Data and Text Mining, Analytics and Visualization.

The 2022 AI-SDV Conference in Vienna, Austria, 10th - 11th October 2022

AI-SDV 2022 is the place to be for everyone involved in advanced search and data applications, text mining and visualization technologies. Individuals and companies that are shaping the future of this exciting space that surrounds us and impacts us all will present their latest research findings, tech developments and visions for the future.

Enjoy a full-on two days of learning, networking and exploring technologies and concepts that are state of the art and will continue to change way we as individuals and organisations work, rest and play. The focus is on Artificial Intelligence (AI), Digitization 2.0 (about making companies, processes and people ready for AI), Deep Learning and other topics identified by our community, who are specialists working in scientific and technical information.

The event features approximately 22 speakers over two days, plus an exhibition to complementing the conference programme.

As past attendees tell us, Vienna is a fabulous location and beyond the formal meetings taking place in the conference and exhibition space, we make the most of this gorgeous location for informal evening receptions and networking dinners.

PROGRAMME

SUNDAY, 09. OCTOBER 2022

PROGRAMME

MONDAY, 10. OCTOBER 2022

09.00	Conference starts at 09:00 Opening by Christoph Haxel Dr. Haxel (CEM, Germany) Update Search & Analytics platform at Bayer Wolfgang Thielemann (Bayer, Germany) Possibilities and limitations of AI-boosted multi-categorization for patents, scientific literature, and web Harald Jenny (CENTREDOC, CH) New Product Introductions: CENTREDOC / Lighthouse IP / Deep SEARCH 9	09 am
10.00	10:30 - 11:00 Exhibition and Networking Break / Breakout Session	10 am
11.00	Where's the one about ...? Looney Tunes® Revisited Jay Ven Eman (CEO, Access Innovations, USA), Marjorie Hlava (President of Access Innovation, USA) AI developments and usability Linus Wretblad (IPscreener / Uppdragshuset, SE) New Product Introductions: Search Technology/VantagePoint	11 am
12.00		12 noon
13.00	12:30 - 14:00 Lunch, Exhibition and Networking	01 pm
14.00	Scientific publishing in the age of data mining and artificial intelligence Dieter Kürty (Kuery Knowledge Management, Switzerland) Extracting information from tables in documents Holger Keibel (Karakun, CH) New Product Introductions: Patent Intelligence and Engineering Management	02 pm
15.00		03 pm
16.00	15:30 - 16:00 Exhibition and Networking Break / Breakout Session	04 pm
17.00	New Insights from Trademarks with Natural Language Processing Alexander Lehmann (Canadian Intellectual Property Organisation, CA) Finding the WHAT – Will AI help? Nils Newman (Search Technology, USA) Conference ends at 17:30	05 pm
18.00		06 pm
19.00		07 pm
20.00	19:00 - 23:00 Conference Dinner / Heurigen	08 pm

PROGRAMME

TUESDAY, 11. OCTOBER 2022

09.00		09 am
	Conference starts at 09:30	
	Machine learning based patent categorization: A success story in monitoring a complex technology with high patenting activity Susanne Tropf (Syngenta, Switzerland), Kornel Marko (Averbis, Germany)	
10.00		10 am
	10:00 - 10:30 Exhibition and Networking Break / Breakout Session	
11.00		11 am
	Rolling out web crawling at Boehringer Ingelheim – 10 years of experience Klaus Kater (Deep SEARCH 9, DE)	
	Embedding-based Search Vs. Relevancy Search: comparing the new with the old Giancarlo Crocetti (Boehringer Ingelheim, USA)	
12.00		12 noon
	Identifying Relevant Patent Data with the help of Artificial Intelligence Ranjith Kumar Manupati (Tata Steel Limited, India)	
13.00		01 pm
	12:30 - 14:00 Lunch	
14.00		02 pm
	Domain Knowledge makes Artificial Intelligence Smart Linda Andersson (Artificial Researcher IT GmbH, Austria)	
	Accommodating the Deep Learning Revolution by a Development Process Methodology Jochen Leidner (Coburg University, Germany)	
15.00		03 pm
	15:00 - 15:30 Exhibition and Networking Break / Breakout Session	
16.00		04 pm
	The race to net zero: Tracking the green industrial revolution through IP Chris Harrison (Intellectual Property Office of the United Kingdom, UK)	
	Creation and updating of large Knowledge Graphs through NLP Analysis of Scientific Literature Stefan Geißler (Kairntech, Germany)	
	16:30 - 16:45 Closing Remarks Christoph Haxel	
17.00		05 pm
