

Latest CAS enhancements expand coverage, improve searching

Paul Peters

Director, EMEA Sales
CAS – SIIL, Netherlands

ICIC, Barcelona, Spain
October 25, 2011

CASM/CAplusSM coverage to be extended with Malaysia (MY) as our 62nd authority

- Kind code A, including granted patents and utility models
- Coverage retroactive to January 15, 2010
- Eligible to be covered as basics or added to existing patent families

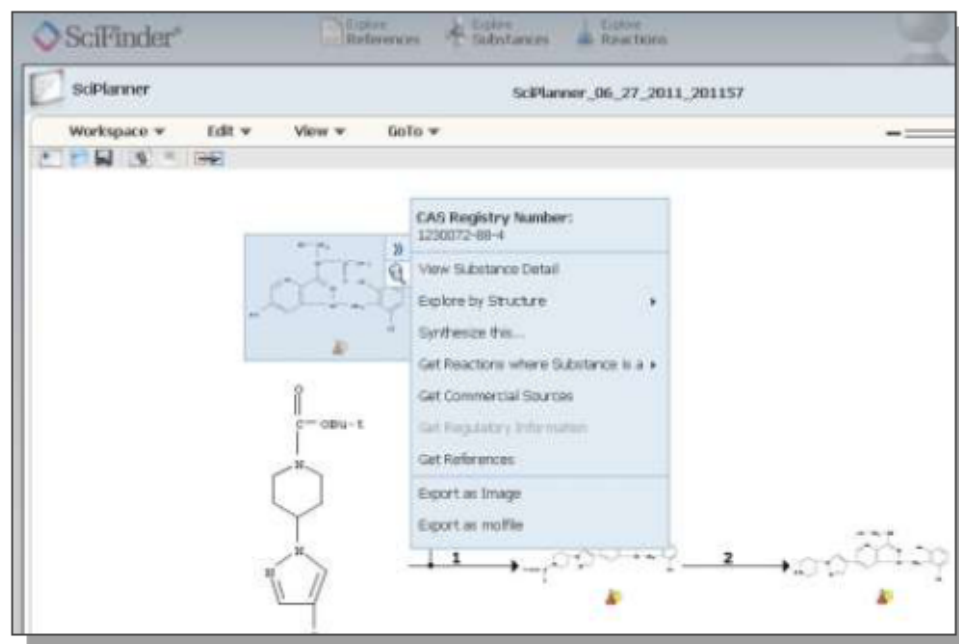

SciFinder users are excited about SciPlanner since the March launch

“One of the key enhancements made in recent memory”

Investigator at GSK

“The new SciPlanner capabilities have revolutionized the way I will search for information”

Graduate Student at Florida A&M University

“The planner expands what I can think of doing in SciFinder”

Graduate Student at Harvard University

More enhancements coming to SciFinder in 2011

- **Content**
 - More ^1H NMR and ^{13}C NMR and mass spectra
- **Search**
 - ACS Table of Contents graphics
- **Analyze**
 - Analyze by target/bioactivity indicators
- **Display**
 - Enhanced reference display
 - Simplified substance table/grid views
 - Target/bioactivity indicators in substance display
 - Browser support for Firefox 6 and Safari 6

**Look for enhanced reaction relevancy ranking
and substance relevancy ranking in the
upcoming months!**

FIZ and CAS are improving the current STN platform while we develop a new platform

- Enhanced MARPAT® display formats
- Enhanced patent family results manager
- First iteration of the new STN platform is scheduled for availability to the STN Advisory Council in November
 - It will bring improved efficiency and usability at the expert level. Powerful new elements include:
 - Project-oriented workflow
 - Combined text and structure queries
 - Simultaneous query and results interaction
 - Real-time analysis of results
 - Virtually no system limits

New STN revolutionizes patent searching for professionals

“It is exciting to be part of the development process of the new STN platform. The new system will greatly improve the efficiency when searching STN, due to an improved workflow support for patent experts.”

Dr. Mark Harper, patent information analyst at Sanofi, Oct. 2011

A division of the American Chemical Society
