ICIC 2011 - The Meeting

The International Conference on Trends for Scientific Information Professionals

For those in the sci-tech world, sharing best practices, networking and evaluating trends have become matters of considerable importance, and the annual ICIC Meeting & Exhibition is **the significant forum** for this, attracting over 200 attendees from the main sci-tech companies and information, service or software providers.

Started in 1989...

These exciting and highly respected annual conferences, that started in Montreux in 1989 and were subsequently held in Annecy, Nîmes, Barcelona, Nice and Vienna, have always provided a barometer as to the strengths and frailties of the world of sci-tech and patent information.

The conference lasts for two and a half days and features approximately 24 formal presentations, panels on topical matters, all interspersed with short new product information presentations. All sessions are plenary. The conference normally begins with a reception on the first evening to enable attendees to begin to network with each other, and has a cocktail party on the second evening. Lunches are taken at the conference venue, and breaks are designed to facilitate networking and interaction. A focused exhibition of approximately 25 stands is integrated within the conference. Attendance at these meetings is highly international, with no one nationality predominating.

The 2011 ICIC conference is organised by Dr Haxel Congress and Event Management, with Infonortics organising the conference programme.

Subject Areas for the 2011 Programme

The traditional focus of the ICIC programmes is **subjects of interest to information professionals in a scientific or technical environment**. As in previous years, this year's programme contains a number of presentations examining aspects of patent information retrieval, including drug discovery; patent information presents many challenges and is thus an excellent test-bed when it comes to information technology. The ICIC meeting's roots in chemical information also ensure that that area features prominently; chemical information was one of the first fields to attract modern information technologies back at the end of the nineteenth century and the very beginning of the twentieth.

Search and Retrieval is covered by many presentations, including those by David Milward (UK), Anne Bülow (Denmark), Josef Eiblmaier (Germany), James Ryley (USA), Gregory Grefenstette (France) and Ron Kaminecki (USA). Another interesting group of papers explores the challenges of developing modern information centres, with Stefano Caporusso (Switzerland), Dennie Heye (Netherlands) and Thorkild Sørensen (Denmark). And current 'hot' information areas connected with mobile information, social network information and e-business are discussed by Randall Marcinko (USA), Georges Fischer (France), Antony Williams (UK) and Antoine Raulin (France).

This year, the **2011 ICIC Patent Panel** examines whether we are working towards a changed and interesting future for all the participants in Intellectual Property. Patent professionals, including lawyers, users, suppliers and developers will give their views in a panel chaired and animated by Pierre Buffet of Questel. The five expert panellists are Ann Chapman of Minesoft (a service provider), Alfred Elmaleh of the French Petroleum Institute (a patent professional), Monika Hanelt of Agfa Graphics (a patent information expert), James Ryley of SumoBrain (a service and software provider) and Yo Takagi of WIPO. The panellists will examine and discuss, with the audience, a range of questions relating to the future of the patent information domain. The future scenarios touched upon will be of interest to everyone at the ICIC meeting. The 2011 programme promises to be even better, more topical and more vibrant than ever.

Venue and Location

The 2011 ICIC will take place at the World Trade Center Barcelona.

Location - The ideal space for the ICIC 2011

- **The World Trade Center Barcelona** is the business park in the Catalan capital. Located on the seafront just a few minutes from the city centre, it has a unique congress, convention and meeting centre with 20 different rooms and some spectacular views.
- The WTCB offers a prestigious location in Barcelona's Port Vell (Old Port) district, surrounded by the Mediterranean, plus a combination of the latest technology and the widest possible range of services for businesses.
- It also features a commercial area and a Grand Luxe 5-star hotel as an integral part of the amenities of this up to the minute business park, bathed in the light and the sun of the Mediterranean.
- For all these reasons, the World Trade Center Barcelona has cemented its position as one of the most important business hubs in the city of Barcelona: a point of reference for business on an international scale, and of course the ideal place to hold an event.
