II-SDV

Nice, 15-16 April 2013

International Information Conference on Search, Data Mining and Visualization

The **II-SDV** meeting takes place in Nice, 15-16 April 2013 for an intensive two days. The meeting provides an international forum for those in the field of tools for advanced search applications, data and text mining, competitive intelligence and visualization technology. The primary focus is on **tools for intelligence** and the meeting examines the requirements of specialists in scientific, technical and patent information.

The meeting will be of interest to those who wish to update themselves and keep in touch with the leading edge of search engines for information search and analysis tools and technologies. It features approximately 20 speakers during the two days. There is an adjacent, focussed **exhibition** to compliment the conference programme.

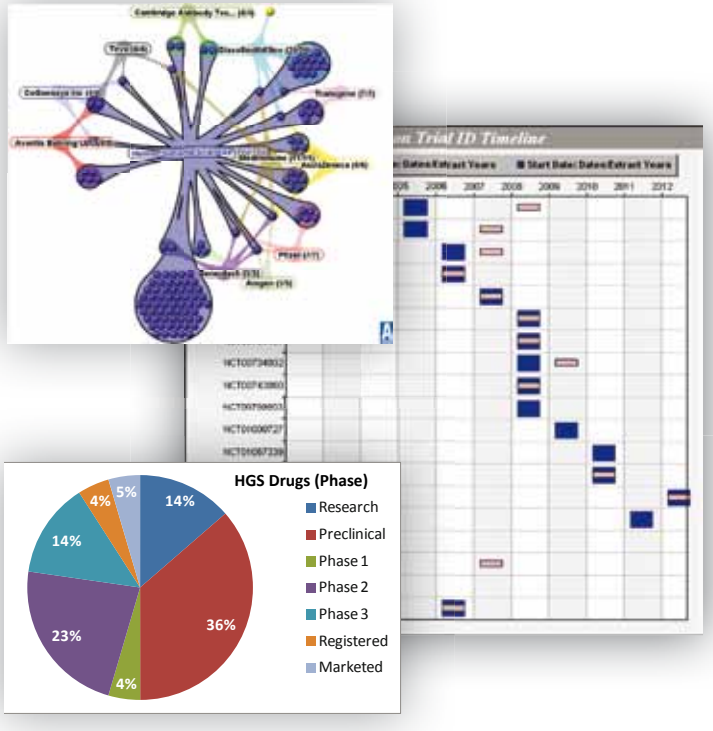
BizInt Smart Charts

Edition



VantagePoint – BizInt Smart Charts Edition helps you normalize, analyze and visualize data from the leading **drug pipeline, clinical trial, patent, and sequence databases.**

Designed for use with BizInt Smart Charts tabular report software, VantagePoint – BizInt Smart Charts Edition (VP-SCE) provides market-leading Data Cleanup, Thesaurus, Record Classification, Keyword, and interactive analytical visualizations.

Combined with BizInt Smart Charts Reference Rows, VP-SCE offers powerful tools for handling duplicate records, conflicting content, and vocabulary differences between databases — so you can create accurate and useful reports and visualizations.
