PATSEER

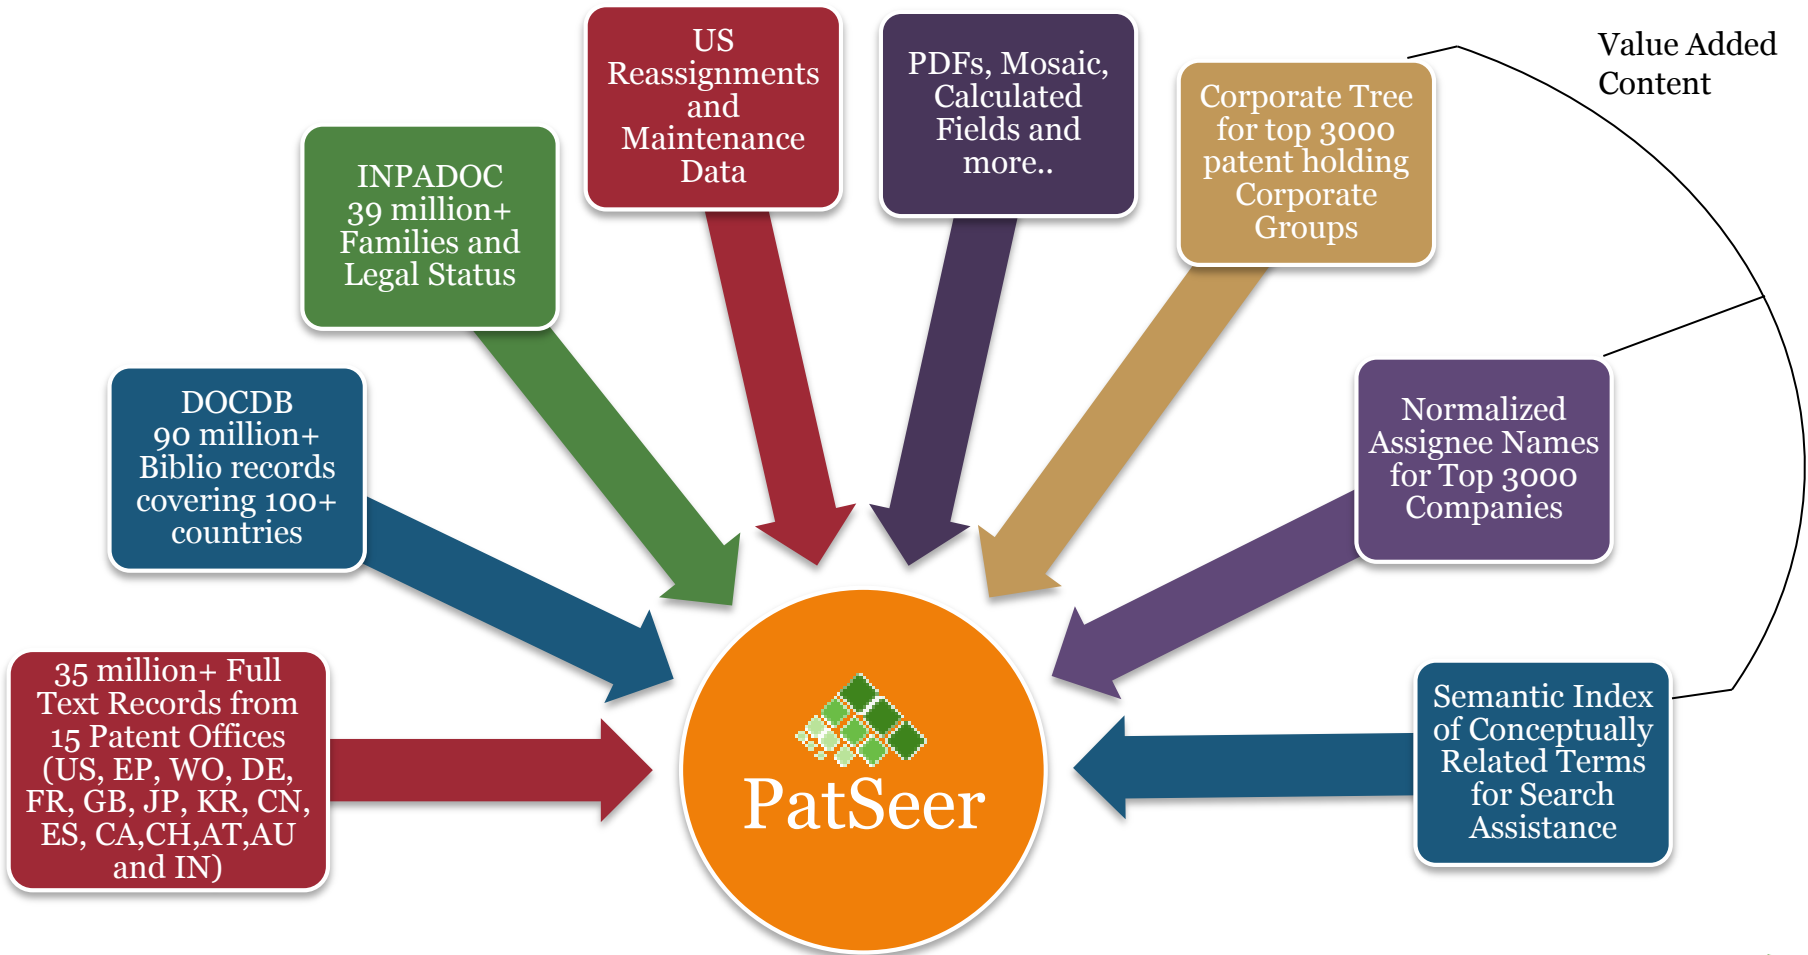

- Web based Patent database with integrated powerful analytics and an easy-to-use interface that everyone falls in love with !
- **Global Coverage** - 90+ Million records, 15 Full-text authorities 100+ biblio countries, Machine translations, PDFs, Images , Simple & Extended Families, Citations, Corporate Tree
- **Breakthrough Analytics** - Multi-dimensional (X vs. Y) analysis using great looking charts, custom fields, hierarchical categorization, Flags/Ratings/Comments, Citation & Family Trees, Co-citation Analysis and a lot more...
- **High Quality Data** - Weekly updated with manual Data Quality checks
- **Advanced Search Capabilities**- Fully featured syntax. Multiple search forms to suit all categories of users with Chemical Synonym Lookup and Semantic Search.
- **Power Collaboration** - Share the Platform and not just the data Web 2.0 style with Patent Dashlets™

The screenshot shows the PATSEER web interface for a search project named 'Anti-Aging Tech'. The interface includes a navigation bar with 'Search', 'Current Searches', 'Saved Searches', 'Projects', 'Quick List', and 'Alerts'. Below this, there are tabs for 'View', 'Custom View', 'Show', '20', 'Start', 'Pub. Date Desc', and 'Legal Team'. The main content area displays search results for 'Anti-Aging Tech' with 1494 records. A detailed view of a patent record is shown, including the title 'A method of brewing a quinoa-based beverage is made to pre-conditioning a quinoa grain to remove unpleasant flavors from the quinoa. The quinoa grain is then soaked and rinsed (germinated), after germinating the quinoa grain is dried and subsequently rinsed. The quinoa grain is required to form a moist and soaked, optionally using these, sterilize, and any other ingredients. The soil is then cooked down to fermentation temperatures, and a Kosher yeast-like Saccharomyces cerevisiae added to the wort to ferment. The fermented wort is then optionally conditioned or collected for distillation. The final product is immunochemically safe and gluten-free. Further provided the product is brewed with Kosher for Passover yeast and a Kosher for Passover facilities, the end product is both Kosher and Kosher for Passover. The fermented quinoa beverage may alternatively be distilled, and aged in Kosher and gluten-free casks, to form a Kosher and gluten-free distillate liquor.' The record also includes a 'Meatware acid composition' and a 'Method of slowing the aging process in a mammalian animal subject to advancing at least one member of the collagen family of proteins, wherein the advancing step includes administering to the subject a therapeutic composition of hyaluronic acid and peroxo acid. Such an animal may then function by removing such groups from proteins. The administration results in reduction of the protein's rate in cell metabolism and prevents genes from...

CUSTOM IP SOFTWARE SERVICES

- We combine years of IP domain expertise in data mining, text analytics and search engines with cost-effective services to deliver custom solutions that exceed expectations and deliver higher ROI !

Sample Custom Services successfully done for various clients:

- Automation and Scripting of day-to-day Patent data analysis and reporting for a client.
- Inhouse US PAIR, EP and WO register tracking application and integration with existing inhouse patent system
- Development of search engine and associated portal for a company's own patents (granted, pending, unpublished)
- Maintenance and upgrades of legacy in-house custom-built (by another firm) patent asset management system
- MS Sharepoint based inhouse patent workflow and collaboration system
- And many-many projects related to Patent iNSIGHT Pro customization ...
